

KEEP + STOW

KEEP THE BLOOM KIND

CLOSE FOR REST

Sweep the left control wing inward until both wings lie flat in the crescent. Keep them low—do not lift during normal use.

- Use on a flat desk.
- Move the broad outer wing—not the teeth.
- Keep fingers, hair, and loose items clear of the visible gears.
- Stop if a part is cracked, rough, or jammed. Never force it.
- Store closed, dry, and away from heat. Wipe with a soft dry cloth.

OWNER NOTE

This desk toy has not been physically playtested or child-safety certified. Stop using it if a part becomes cracked or rough.

INSIDE

THREE PARTS. ONE MOTION.

**1 × crescent
chassis**

**1 × left wing /
control**

1 × right wing

ORIENTATION CUE

Star openings face up. Root gears point inward toward each other.

*Already assembled? Unfold and begin at
FIRST BLOOM.*

MOON-MOTH

BLOOM

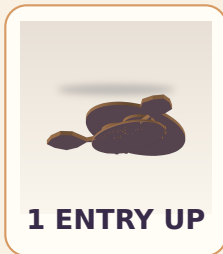

A THREE-PART TRANSFORMING DESK
TOY

**SWEEP ONE WING
WATCH BOTH UNFURL**

SETUP • 1-2

LOAD + CROSS

1 ENTRY UP

2 CROSS UP

1 ENTRY — KEEP RAISED

Set the chassis flat, posts up. With star openings up, lower the right wing over its post at the only keyhole opening; then load the left. Keep both roots raised.

2 CROSS STOP — KEEP RAISED

Mesh the center teeth. Sweep both wings toward the moth until the roots pass the usual open stop and match frame 2.

UP = ROOTS HIGH

SETUP • 3-4

ALIGN + SEAT

3 ALIGN UP

4 DOWN

3 SERVICE POSITION — RAISED

Move both wings a small step inward until they match frame 3. This is the position where both roots lower or lift together.

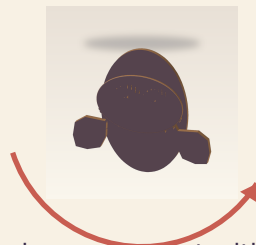

4 PRESS DOWN TOGETHER

Press broad solid root areas straight down—not teeth. Keep the wings level, then sweep slightly inward beneath the round capture ledges.

**READY: LOW + LEVEL
TEETH MESHED •
CAPTURED**

FIRST BLOOM

STEADY + SWEEP

OPEN

Hold the lower crescent with one hand. With the other, sweep the left outer wing outward. The right follows. Stop at the open limit.

CLOSE + RESET

Sweep the left wing inward to the flat crescent. Keep both roots low throughout.

LIFT, SKIP, OR JAM?

Stop—do not force. Return both to frame 3 and reseat together.

REMOVE: frame 3 lift both; sweep raised to frame 1; left off, then right.
