

GUTTERFALL

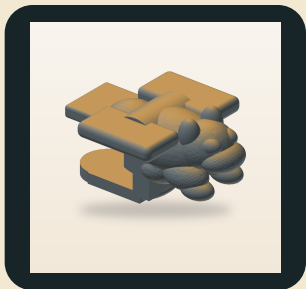

PRESS. DIVE. CATCH.

ONE GARGOYLE. ONE TABLE EDGE. ONE DRAMATIC DROP.

MAKE THE BEAST FALL

Inside: 1 rigid Gutterfall gargyle

HEAD TO OPEN AIR →

1 SEAT

Use a sturdy, square edge 18-28 mm thick. Slide the open belly-tail throat over it.

2 PRESS + RELEASE

Clear the space below. Press the shoulders toward open air, then let go as the belly rolls.

3 WATCH THE CATCH

The whole rigid gargyle turns nose-down. Its curled tail should meet the underside and stop it.

4 RESET

Grip the body. Lift it back up around the same edge until it rests flat on top.

IF IT DOES NOT CATCH

Stop using that edge. Hold the toy; do not let it hit the floor.
Try another sturdy 18-28 mm square edge. Never force the throat.

Use away from people, pets, glass, heat, stairs, and valuables.

Check for cracks before use. Wipe dry; store flat. Not a climbing aid.
