Build your Basketball Hooping.

A tabletop basketball game. Thumb down, ball up: press the green cup, let go, and the ball flies for the hoop.

Before you start

+

You will need

Nothing else. No tools, no glue. A rubber band is optional and not in the box.

1

One way only

Every part fits one way. If it won't go, turn it round and line it up again. Never force it.

push

Press firmly

The post and the pin are a snug fit. Push them straight in until they stop.

!

Small parts

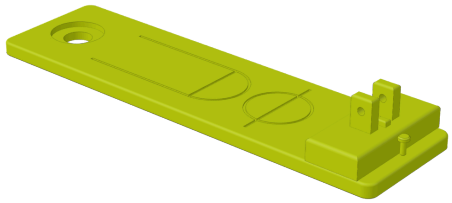

Not for children under 3. The ball and the pin are small.

Build on a flat table.

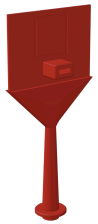

What's in the box

6 pieces

Bag 1 **Everything · 6**

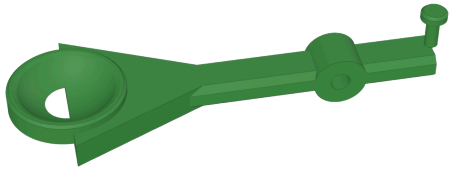

Court
×1

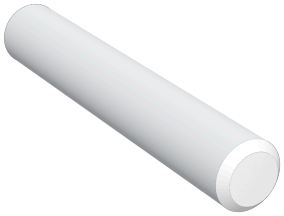

Post & backboard
×1

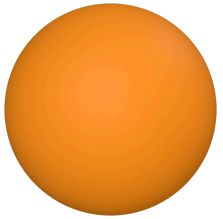

Hoop
×1

Lever
×1

Pin
×1

Ball
×1

The court comes in one piece, with the two lever posts and the band peg built in. The ball is 0.8 in across.

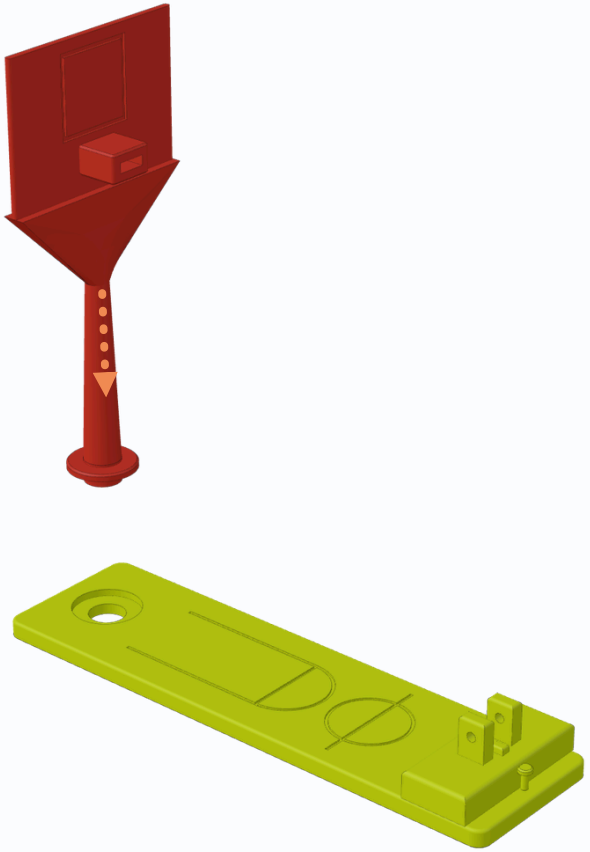

Optional **Not in the box**

Any ordinary rubber band. The game works without it; a band just gives the lever more snap.

1

Post & backboard ×1

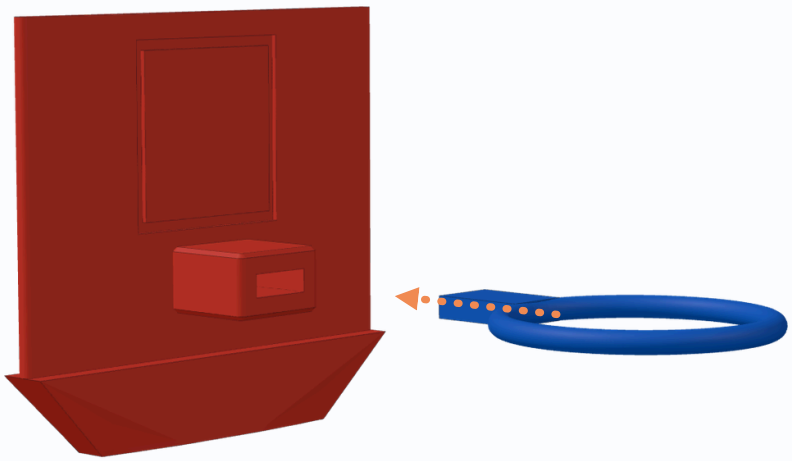

Push the post into the socket at the far end of the court.

Press the post down until its flange sits flat on the court.

2

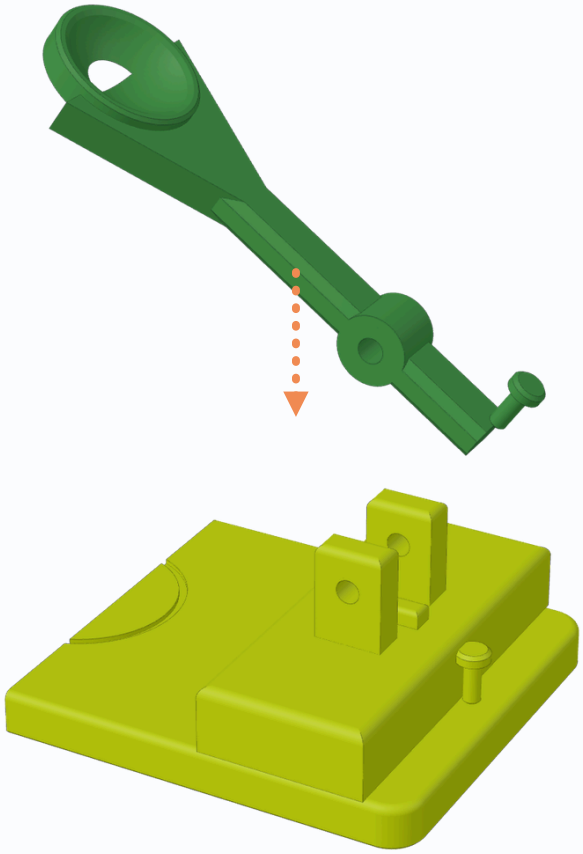

Hoop ×1

Slide the hoop's tab into the slot in the block on the backboard.

3

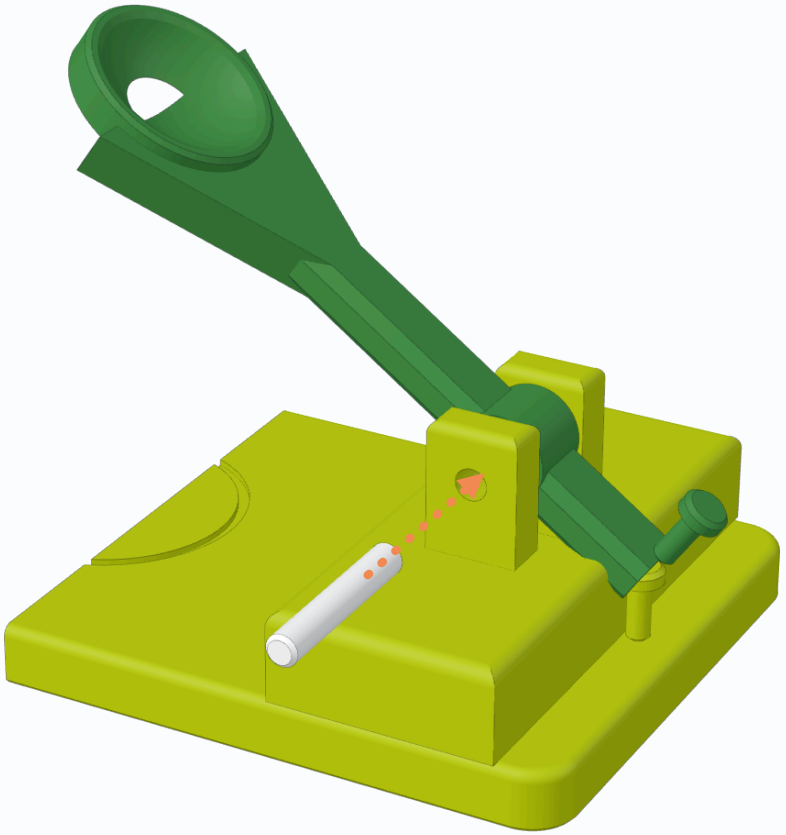

Lever ×1

Set the lever between the two posts, cup toward the hoop.

4

Pin ×1

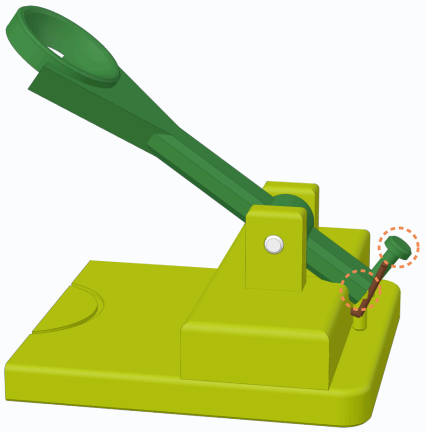

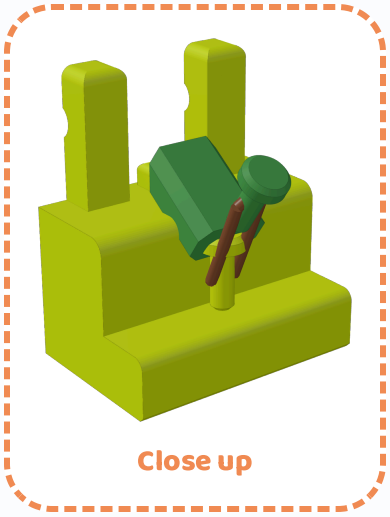

Push the pin through one post, the lever and the other post.

The lever should swing freely on the pin. If it rubs, push the pin in until both ends sit flush.

5

Rubber band **optional**

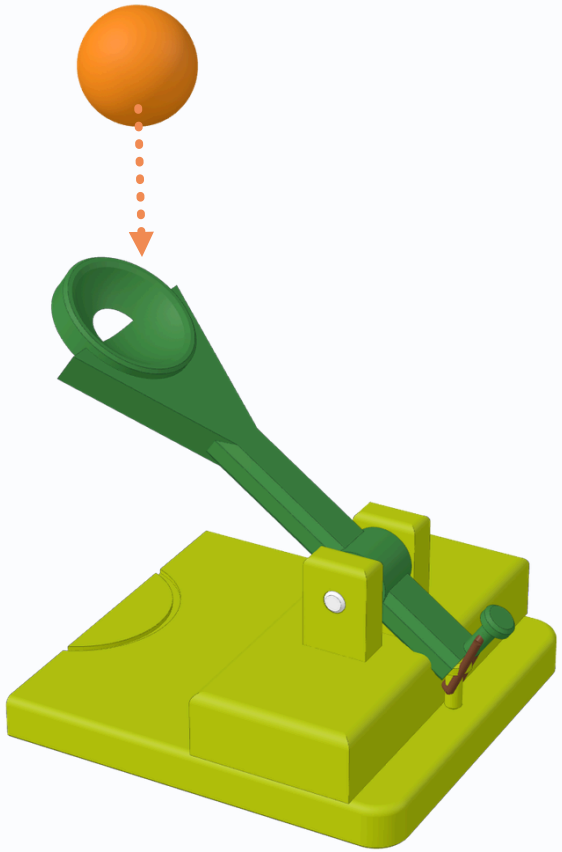

Close up

For more snap, loop a band over the court peg and the lever peg.

No band? A sharp tap on the short arm does the same.

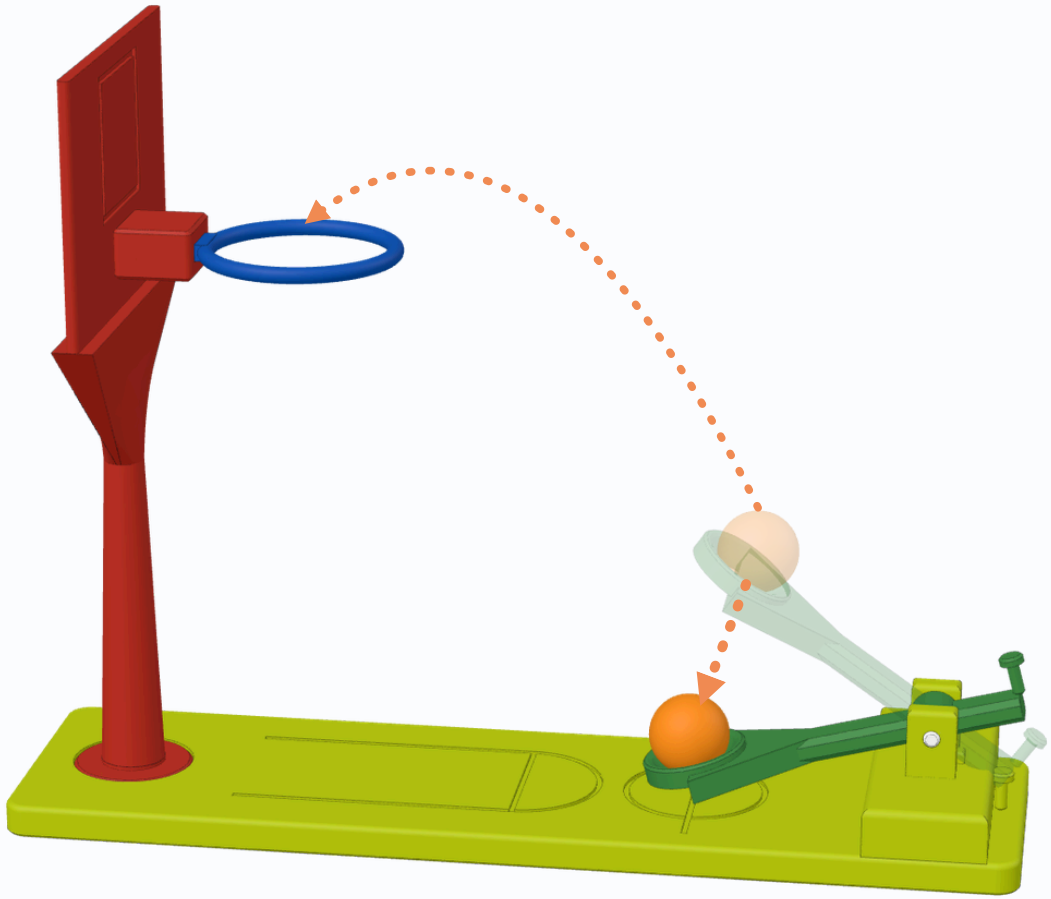

6

Ball **x1**

Drop the ball into the lever's cup.

Thumb down, ball up

1. Press the cup down until it touches the court
2. Let go: the lever swings 42.5° and the ball flies
3. The hoop is 4.2 in out and 5.3 in up

Score a basket, put the ball back in the cup and go again. Play to five or ten.

You built Basketball Hooping!

Every piece was designed by AI agents in the Autonomous workshop, then made and checked by people. You did the best part.

Basketball Hooping · about 10.0 × 3.5 × 7.6 in · 4.4 oz · PETG plastic

Not for children under 3: small parts.
